

Pneuline Supply, Inc.

PSSV SERIES SELF-SEALING CHECK VALVES

Key Advantages

Function and Reliability:

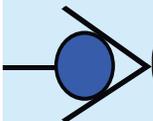

The PSSV Series is manufactured with two optional barb sizes 3/16" or 5/16" and features an integrated silicone disk that creates a secure seal to prevent backflow. This design ensures dependable performance across a wide range of applications.

Superior Material Selection:

Choose from high-performance materials such as Polycarbonate, USP Class VI Polypropylene, and Kynar® 720. Each option is engineered for durability and compliance in medical environments, with production in a Class 7 cleanroom ensuring purity from the start.

Precision & Quality:

Every unit is crafted with meticulous attention to detail, with optional Class 7 cleanroom manufacturing available for sensitive applications. Components are molded with a flow direction arrow for easy application.
